

# How To Navigate The New Staffweb

The most effective web sites help visitors find what they need quickly so that they access the tools they need, can use the information they find to make decisions, and learn about what is going on. Even when search is available, most visitors start their web experiences by navigating.

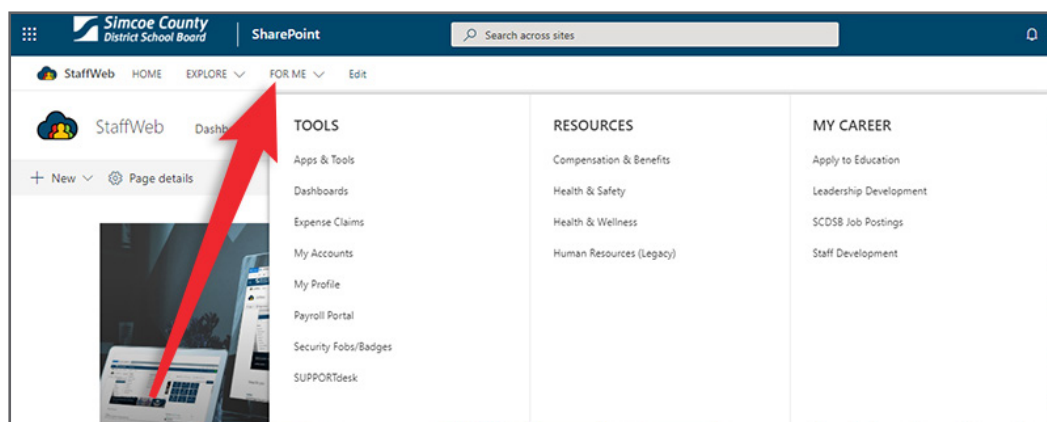

With this in mind, the StaffWeb navigation menu lists most of the sites connected to StaffWeb. There are 2 main menus on the navigation bar – **EXPLORE** and **FOR ME**.

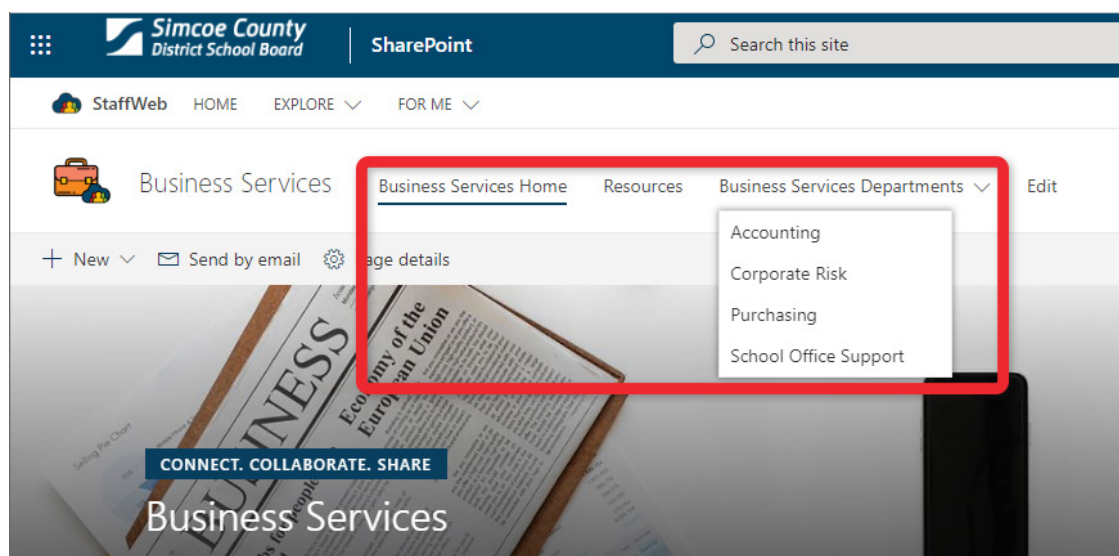

We have organized the **EXPLORE** menu to include sites that are directed to more of a department-based listing.

The **FOR ME** menu lists sites that are for you as an employee. This menu includes popular tools and resources for you.

The main navigation menu will be displayed on all sites that are connected to the StaffWeb, and each individual page will also have its own menu for navigation within that specific site.

As we move forward with the new StaffWeb, you may notice some of the menu items may change. Once we start receiving feedback and take a look at the analytics, we will tweak some things for an improved experience.
