

School District of South Milwaukee Early Childhood Developmental Screenings

The School District of South Milwaukee offers Early Childhood screenings to preschool aged children who live in South Milwaukee and may be experiencing difficulty in any area of development. Information about a child is collected through parent interviews, observations and interactions with the child. The screening reviews the child's development with regard to speech/language, motor, cognition, self-care and social skills. The screening helps to identify possible delays that may warrant further evaluation.

Early Childhood Developmental Screenings are offered to children between the ages of 2 years, 9 months - 5 years who are not already enrolled in school. There is no cost for the screening. Please call **414-766-5041** for an appointment.
